During past heavy rain events a number of acute drainage issues have been identified. (See the red circles and associated images.) The few problem drainage areas have not become severe enough to cause extensive property damage.

In general, these issues have been a result of extenuating circumstance, not simply the rain event itself.

**Please call the City of Milton Planning Department at (850) 983-5440 or the Santa Rosa County Floodplain Manager at (850) 981-7092 for additional information or for property specific flood hazard information.**
